

Lupitair 24

The ultimate climate solution for your expansion or dormer

A dormer or expansion adds substantial space to your house. Naturally, you would like this room to be nicely warm or cool.

Lupitair is the ultimate climate solution for flat roofs, like your dormer or expansion. One system to cool or heat the room with no outdoor unit in sight. Energy saving, quiet and affordable. You cannot see the difference, you feel the difference.

Advantages:

- Cooling, heating* and ventilating
- No outdoor unit in sight
- Very quiet
- Easy to operate
- Low-maintenance
- Energy saving
- Easy to install

* see specifications

Lupitair 2

Lupitair owes its name to the Roman god Jupiter, Lupiter in Latin. Just like Jupiter ruled the sky, Lupitair takes care of an optimal inside climate. With one push of the button, you create the desired climate in the room.

Standard outdoor units for air conditioning systems are often a thorn in the eye. With Lupitair you own an outdoor unit, invisible from street level. The system is an excellent alternative for traditional air conditioning and radiators, there is no need for extra investments. Inside the house you will not notice a thing, the 2 design grilles quietly provide for a comfortable air flow. The built-in filter purifies the air. This way, you create a healthy working or living environment. Because of the integrated heat pump, Lupitair saves energy and costs.

Please contact us for more information. We will gladly help you think about your climate solution.
